\* LBA has been EASA accredited authority for JAT Tehnika Part 145 AMO until mid 2011. From mid 2011 EASA accredited authority for JAT Tehnika Part 145 AMO is CAD of Republic of Serbia.

## INTRODUCTION

The Shop Capability List (SCL) includes all components that "Jat-Tehnika" d.o.o. Belgrade – Maintenance Organization/Repair Station is able to maintain and indicates the actual, highest level, authorized task (1 - Inspection, 2 - Repair, 3 - Overhaul).

The insertion of new Part Number into the Shop Capability List is proposed through a form Rating Amendment Proposal, AMO JAT 001, duly filled up by the involved responsible department and submitted to the Quality Assurance department. Contents update is as per procedure MOE 1.10.3.2.

In the case the component maintenance involves more than one department or requires approved subcontractors, the proposing workshop will be responsible to coordinate outsourced maintenance activity in accordance with MOE 2.1.

QA bureau performs all required checks, including audit if applicable, to verify compliance of "Jat-Tehnika" d.o.o. capability with EASA, FAR and/or other regulations.

After verification, amendment to SCL shall be approved by the Quality Manager, and, when applicable, sent to the Competent Airworthiness Authority in accordance with MOE 1.10.3.2.

Should the maintenance of a component be suspended, cancelled or revoked, on request of involved workshop department or per audit findings, QA department will inform the Competent Airworthiness Authority, Marketing Department and Technical Documentation Department in accordance with MOE 1.10.4.

Each issue of SCL document cancels and replaces the previous issue in its entirety.

The amendment and the distribution of Shop Capability List, as well as form AMO JAT 001 approval are performed by QA. SCL is issued every six months and is approved by Quality Manager. SCL is distributed to Production and Quality function (MOE 1.11.2.2.).

Changes in the list are identified by N (New), R (revised) or C (cancelled), in respect to previous edition of SCL.

### ***Extract from MOE 1.10.2.4 "Shop Capability List Extension"***

*The insertion of new Parts Numbers into the Shop capability list (SCL) is proposed by responsible person within involved department, by submitting the appropriately filled up "Rating Amendment Proposal" form to the Quality Assurance department.*

*This department will perform all checks deemed necessary to demonstrate the compliance to the regulation.*

*The satisfactory outcome of the verifications shall enable Quality Assurance Department to apply for Shop Capability List amendment to the Competent Authority.*

*Significant changes in the Shop Capability List (new processes or component types) may lead to further checks.*

*After all necessary checks the Quality Manager approves the "Rating Amendment Proposal" form (AMO JAT 001).*

Such signed form:

-for **minor** changes (similar component, minor adjustment to existing technology, tools and equipment, etc.) validates amendment to the Shop Capability List and has to be submitted to the CAD for notification purpose;

-for **major** changes (new component, requiring introduction of new technology, tool or equipment, new C-rating, etc.) has to be submitted to CAD for approval purpose.

Responsible Person in Quality Assurance Department updates Shop capability list (add new and remove existing components) and informs relevant departments about these changes.

Copy of the "Rating Amendment Proposal" form, with the approval of the Quality Manager (or his deputy) for minor change, or CAD for major change, shall be dispatched by Quality Assurance to the users of SCL to amend it.

Before performing a new task, Jat-Tehnika shall obtain everything set forth in Rating Amendment Proposal form.

More details are given in local procedure COM-02

**LEGEND:**

Column title	Column content
PART NUMBER	Part Number (Manufacturer identification number) of the part/component
Description	Name of the part/component
REF. DOC	Applicable maintenance document
REV. NO	Revision number of the applicable maintenance document
REV. DATE	Revision date of the applicable maintenance document
Manufacturer	Name of the manufacturer
ATA	ATA chapter code
Rating	Code per APPROVED SCOPE OF WORK/ APPROVAL SCHEDULE (C7, C19, ...)
Shop	Three letter workshop code per CODE LIST OF ORGANIZATIONAL UNITS
Cap.	Shop capability: 1 – inspection, servicing, adjustment, lubrication 2 – part, minor (sub)assemblies replacement 3 – damaged/unserviceable part/ component replacement, repair, overhaul
Amd	Amendment status (N - New, R - Revised or C - Canceled/ Removed)

Note: Components with same basic P/N, but with different dash numbers, covered by the same CMM, are listed as "basic PN" plus "- XXX" (example: 11611-XXX).
